# LETS

## Lateral Evaluation Television System

### ***Another innovative Aries product engineered to meet and beat our customers' challenges.***

Trust our well designed features to make your inspections safer and more convenient than ever before. Our LETS system's low friction drive mechanism virtually eliminates cable wear, and the automated self-capturing push cable retrieval gets you out of tough situations easily, increasing reliability and product life. To make operation even more trouble-free, the LETS system easily adapts or retrofits to your other systems.

#### **SYSTEM BENEFITS:**

- Inspect Lateral and Mainline simultaneously
- Two push cameras available: choose either self-leveling mini camera, or pan-&-tilt camera.
- Lateral Camera Cable retrieval is achieved with little effort using Aries Automatic Rewind Reel
- Adapts to most CCTV Inspection Systems
- Inspect Lateral Up to 150' and Mainline up to 1,000'
- Available for Portable Inspection Systems
- Improved Pipeline Clearance
- Push cable design eliminates cable kinking and sludge build-up in drive system
- Open drive system is self-cleaning and maintenance free
- Cable storage design provides complete operator safety by eliminating the need to lay cables on street
- PIP (Picture in Picture)
- On-Screen Lateral Footage
- Power Forward/Reverse and Freewheel Transporter Movement
- Integrated 512 Hz Locating Beacon
- *Pan and Tilt upgrades to existing LETS are available.*
